

## Adam to Atom: Pt2.

1.

“Oh my Name Is “Peter Pan” and she burst out laughing at me and my silly attitude with her,

“No, my Lady, my Name Is Walter, Mother felt It would fit a Church Minister, which She hoped I would be” poor Mother, I believe she was wrong about that as well, you see, I liked the shape of Girls too much, and I don’t think the Churches would like a Young Molester in their midst so I joined the Navy instead Mother was mortified, and I found some very interesting young Ladies to study!, and Cindy started laughing at me and my bullshit.

Before breakfast next Morning, while still laying In our Double rubber Mattresses on the Tray, I looked over the two kids to see if I was under any scrutiny at all and found I was in the Clear, so I turned over her and Kissed her good Morning, and started to move my Leg over her Belly, and she smiled And shook her head and said two words ,”behave please” and ran a hand down my Penis under our covering Bed Sheet, and she grinned at me, and said quietly, Do you know you’re the second Man in these three days of being with you, that I have been approached by two Men for Sex, You, and that Dealer chap when you went after our Caravan Watertanks, and I had a shower and he joined me but, I have to refuse you now for a few days for me to finish with Nature, as I do!

She snuggled up to me and said,

“You were right, can I have my wetsuit completed please, I was a bit cold last night, and even holding you closely was not enough to warm me properly, and she kissed my cheek, We then arose to a “Weeties Breakfast” and Toast and Coffee, Then we walked out into our close bushland, and I showed Her how to Piddle like a Standing Man, and She was a little Girl yet again, with her Giggle at me, and claimed she would have It down Pat within a Day or two, If she had my sort of Gear to Practice with, and my Further Instructions to her each day, after the sun comes up I’ll do your wetsuit for you”!

I walked back to the Truck and took a Medium size Box from the Cab, and opened it and turned on the piece of equipment I took from it, and It was Silent and I turned It on and off and checked it yet again, then turned it off, after I held It near my Penis and then I put it her near her Vagina, and found and pressed the Test Button and It Buzzed very loudly and she jumped back and I turned it off and stowed It safely away!

What was that she demanded of me, with a quizzical look in her Eyes, and I smiled and said I have to check your Vagina every now and then, that was a Geiger Counter, and I was checking for Radio Activity In you but there was no reading as yet, so I will have to warm it up and Test It again at least once a Day or so, And I got Whacked and a kiss from her for being a smart Alec!

When you get around to my Wetsuit, you should take a closer look at my gear you might be put off It when you do, but I’m used to that now, but that is life I guess, where are the kids she asked me” I looked up and said, “picking Wildflowers, I said”

“Check me out please if you will, and I lifted her Skirt and just above her Vagina there was a fair bit Of scaring Tissue, and I asked her what happened to you Mrs, and for that matter Who did it to you Is more the question, and I kissed her Clitoris so it would get better quickly as my Mother always did To me or my Sister with a grazed knee damaged while we played in a Paddock on the Farm!

2.

I used my Fingers around her Clitoris to raise her to a climax and she went wild and I thought Bugger it and gently mounted her and found it was like making love to a near Virgin and I got stuck into her and had to ask if she was on a pill for her protection?, and she shook her head and quietly whispered to me, no Womb, and I just blew my stack into her with her legs trying to pull me into her as far as she could, and I realised she was laying back from me crying to herself!

We both heard the Girls as they closed in on us, and we rearranged our clothing and stood to be able to welcome them both and we were shown with pride, the two bunches of Beautiful Wildflowers they presented us with to be admired by us all and sundry.

“These are absolutely Lovely my two ladies, and they both preened themselves to my compliments Directed at them both”!

Later on I found in a rough estimate we had travelled about 370 Miles together Through Rocky Territory, in about two solid days as well as Scrub Plains and Scrub bush and now we were heading North towards Leonora Which was really Dry and Dusty this time of the Year, so we were greatly relieved to pull Into Leonora after another 230 Miles of nothing, to find we still had over Half our Fuel still left In our Tanks, and so we Officially paid and Camped In the Town Caravan Park!.

First Item was a Hot Shower which we all shared being in a stage address with two little girls and then a change of our clothes, then our Wetsuits were scrubbed out as they absolutely Stunk of our Perspiration from our travels as we went and we now felt like Tourists while In this delightful town, That is, until one night two Police Constables were Shot to death, for no apparent reason, by Three Bikers and the town went Berserk overnight, and Men wore Pistols in their belts, Including me, I just had a bad feeling about all of this!

” I asked Cindy why the Girl favoured me to wash them down, Or to undress or dress them both, I am a stranger to them not their “bio Father,”

“They seen their Father shot dead in front of them, then you come along in their hour of need, and Without any second thoughts and buried him properly and took his place, so you are the Dad until I can find another to take his place for us”

“Why have they not turned to you as the Mother”

“I am only Daddies Fuck, I am not their Mother at all, I have never been able to be anyone’s Mother In any way, as I have no Womb, and never have had at all, I was born as a “Transgender” and had both a “Penis and a Vagina” to play with as a kid, My parents were all religious and refused to follow the Doctors advice and remove one of them, so that, with adulthood became my decision, and I have made it and I feel free as a bird”

“I rolled over and give her a nice slow kiss, on her Clitoris and asked her can we start again?”

Next day I took them all shopping again with one on each arm and we stopped for an Icecream in a Café and were having a ball together, when two Bikers parked their bike against the Curb behind our Truck, and started to walk all around it looking all over until they reached the Passengers Door and he opened it, and from the Café Door I shot him Dead, and the second one ran like hell around the rear of the Tray straight into my second shot, and I reloaded my Pistol immediately and replaced it in my Holster for future use if needed, then I picked them up and threw the Bodies on my Tray!

3.

Within seconds we had a crowd surrounding us, demanding to know who I was, and I drew my Warrant Card, the same one that any policeman would carry and kept one hand on my pistol in case there was more than the two in front of me on the ground, and our two Girls were stuck to Cindy like glue, do remember they watched their Father go down the exact same way, I asked where I might find the undertakers and one chap climbed into the cabin while another climbed on the tray And following the directions I drove back one Street and they were unloaded for me!

I then returned to the main street and drove to the same Café and parked out the front, and my two Kids came running out followed by Mother, and I was dragged back into the shop and we had yet Another Ice cream each in the somewhat crowded atmosphere of the Café and I dodged all the asked questions fired my way, we finished the Ice creams and remounted our truck, and I patted all three beautiful Bums as I helped them in, and we drove off to many Waves and calls of good luck!

We refuelled the truck and replaced only Food Produce that was Sealed completely, and I got a report that the Radiation Cloud was indeed heading North but was still West of Mt Magnet as yet and In fact slowing It's Northern progress, and the movement of Citizens on any Northerly Heading was suggested to all, so I passed this report on to the Service station owner and so we both decided on heading towards Leinster, and then "Agnew" and my orders become a Voted upon decision!

For our future safety, I warned Cindy that Families I will help, while any Bikers will Disappear as I'm ordered to do on sight if they crossed our paths, and she slowly nodded at me and we moved out and headed North, by West finally we entered an area called Tarmoola which held two Houses with Cattle and their Families as well, and we made ourselves known and filled up with water, stayed for two more days, and I told them we were going all out for the coast to stay before Heading Further North and that's where I will find you a house and get you settled in there before I go more North!

Anytime we were Travelling along the Road, I had warned Cindy and the Kids to watch out for a Red coloured Panel or Signpost or Red Fence Post, to tell me and I would show them some Magic That is very secret too me alone, Eventually Young Peta spotted one and I stopped and rummaged in One of my bags for my earphones and Morse Key, and she and I walked over to the Fencepost and I tapped in a Code Name, and let her listen to the return code and her eyes near popped out, and she ran like hell to Cindy when a Voice spoke to me and, asked for my position and Report as well!

We left them in peace and headed West to , the Northern Road to "Bulga Downs" and were going onto Sandstone but my updated orders told me to head for Mt Forrest instead, as I was ahead of the other scouts and where on the Southern side we would find a large Cave we could hide the Truck in, with Heavy thick and High Scrub In front of It all, so we backed Into the Cave entrance and parked for a Week while we watched the Sand and scrub Plains below us for Motor Cycle types, and we were to thin them down a little and in General, make them feel uncomfortable and Unsafe while we kept out of sight of Them during the day and showed no lights at night and I was told a "Well done" for my antics in the town of "Leonora", that will shake them for sure, and give those people A bit of confidence in the things to come!

4.

Then once the other Scouts had caught up in a Lateral direction I could continue North and continue to thin out anyone I found who were unwanted to society Sure enough, after Two more days had passed by we started to see little dots that trailed dust everywhere they went and under the Binoculars became Motorcycles, and at every road joint they would stop and check the road for tracks, I had a Feeling my cover was blown, or at least suspected, and I felt my Lady was entitled to be told who and what I was, so she could make her own decisions for her future!.

After our Supper that night, we checked our Cave for any type of Fumes it might carry and were very pleased to find none at all, and although we could feel a Gentle Breeze drifting out the Front of the Cave, we could find no source of an entry, until we searched further in and found in the Darkness a beautiful underground Creek running gently through the Cave from the East to the West side, no doubt bound for the ocean underground!

We lit a small night Fire and, I sat drinking my cup of Coffee, while I explained my reason for being here sitting on a Hill, In a Cave, with a lovely lady without her Knickers talking, a lot of Bullshit to any silly drongo who will listen to me!

Half my cover is that I am a Mystery Writer, a bit of "James Bond" and a bit of a Fool who runs about confusing any Crooks He runs into on his Journey's so, here I am in the flesh and your my lovely Lady who shares my Bed If, I ever get lucky enough to try her out that is, and she kissed me And we lay in the Dark on my Mattresses on the Cave Floor, between the Kids and the River!

"But, you shot those People, and they are Dead, Stone Dead"

"Yes, I know, but there has to be a little realism in any Story Isn't there"?, and grinned at her"

"Look my love, I cannot tell you all, I think you wouldn't last long under their Torture If they got hold of you, Firstly, there is a lot of Fuel hidden in this area, and you shouldn't know where, until you need too!

"Why are you here on your own Walter, that does not seem fair to me, In fact, why at all are you fighting them,"

"You know there are Terrorists about our World don't you?"

"Yes, of course I do" she agreed,

"Well, you and I are now Terrorists against them and their Intentions against Honest People"

"Oh, I think I see your point" Mister, about a sort of "James Bond", who am I then, just a Cindy, without Her Knickers on, Oh that's a real mystery that is!

"I volunteered for this Caper, when my " Wife" decided to run Home to her Daddy in Kwinana Rockingham, two miles from "Ground Zero", Tell me Wendy, Who's got the Hottest Vagina between you and Her, Your Five Hundred Miles from that "Ground Zero", and she is or was Two Miles away from there, She wouldn't listen to me, you did, and your alive with me in a Cave, and I hope for our sake to stay alive as well!

The reason each of us Scouts are operating alone, is that for man to hide is deadlier then a group, and is easier to hide on his own as well as safer, which is why I'll drop you lot off at the coast, and I Hope to visit you all from time to time!

5.

OK, James Bond, what comes next if I may ask, that's easy "Money Penny" drop them Knickers please, and I'll check you for any "Radiation" you might have in there, then we can have a Cold Bath before our Bedtime in our Backroom, and She Chuckled at me as she lay back to receive Her medical from me, after which we enjoyed our Cup of Coffee, and I went back to keeping a watch until it was Dark as all Hell!

After it was Dark I left her in our Cave, and scooted down the Hillside and checked about the old Farmhouse around the "Oasis" and found the Electronic Wire was still active, and tapped a Code onto the Wire to let all know I existed Here, One Minute later I got a return Code wishing me well, and I went Home to Cindy!

Two days later, we had Visitors, they arrived, In a Helicopter then later, on two motor Cycles and they spent many minutes checking out the Landing Pad used at the road Junction to no avail, The Chopper had landed on our hill above us and dropped all the gear needed for another week, and the whole Crew took Cindy to be my Dead Wife, Catherine so, we had little or no Problems, and I asked them to park down on the Road joint and bury an explosive in the ground like a food drop, which should make them more careful about where they go, so they will have a Tendency to keep their Distance,!

We climbed up while it was still dark and bought our Loot down and Stowed it in the truck while it was still in darkness giving us less chance of being spotted by any Hunters, then I walked downhill to the "Oasis Fence" and thanked my boss for our Goods he sent us!

Come Morning we sighted Three Motor Cycles making much dust as they travelled, and when they reached the Road joint where the Chopper had landed, they ran about twenty yards to where the hole was partly open to show it a little better!

They proceeded to dig out whatever Treasure had been left for us supposedly, and within Minutes there was an unearthly explosion and the Bikers were all three Dead, That s another Point to us, and I Smiled!

Cindy and I walked down and stole one of the Motorcycles, and pushed it right near the old Tin Cottage, just to make a mystery of It, and we retired yet again to our Stone Bath- room before we had any supper, the Morning after this I was told by the Message Wires to cause a bit of a concern for our Biker Neighbours so I made my way up the Hill after I had fitted a Telescopic Sight to my 303 Rifle, and decided to sight it in on the Bikers that turned up for a look see about the place!

We left the two kids in the Truck and they seemed ok with that, but Cindy kept a trek up and down to keep an eye on them as well, and I understood her concerns, this was certainly not Suburbia then Cindy asked to come with me, for a bit of a change and I filled a Water bottle and packed a few Bickies as well and up we climbed and settled with a loose Tarp over us both and we waited, a little over two hours passed before she excitedly pointed out two Motorcycles Roaring across the sands below us about a Mile out from the base of our Hill, So I setup the Rifle and the sights as well, then I let her use and setup the Binoculars to suit her eyes!

I told her to watch the front Chap and see where any Dust was kicked up anywhere close to him, I took aim asked her if she was ready, and as she said yes I fired and she damn near Shit herself with the Roar of my Rifle, and with the count of "one-and" he fell off the Bike onto the ground and his bike went arse up and he was on fire, I must have hit his Fuel Tank which splashed him and he caught fire as well!

6.

His Mate slowed and went back and helped to put his fire out, and they both rode off on the second bike, for their camp, so I sent a Second Shot right after them both, but I did not get lucky again that evening, so we headed back to our Camp in our Cave, and took our Bickies and Water along with our Tarp back with us!

Then just on dusk we had a Surprise visit from our Chopper with Two more Riflemen and more supplies to feed them as well, then It left us and flew off into the night!.

This angered me, I had asked for no reinforcements as yet, and straight away one decided He would take over the camp and any orders he thought was a good thing, so I informed him I was taking Cindy Home and I would be back in the Morning, if I felt inclined and we packed our Gear and mounted the truck, and he tried to stop my leaving, so I hung my Pistol out the window and fired at his Head, and he dropped to the Cave floor with a scream of shock not expecting my actions!

As I passed him, I apparently ran over his Hand and he screamed and I gently picked our way down to the level ground and quietly drove off to the Message Fence, and sent a message as to How, and When, and why things happened, tell me when they are evicted, I believe the sight is now compromised as the Security is blown, get yourself another Target, Bulga Downs looks safer then here, Good night, don't ever interfere with our safety again!

We arrived at Bulga Downs Station that evening, and Parked and camped in a creek bed so as to be seen only from the Sky, and we slept on the Truck Tray and made love to Cindy for near half our night before we slept snuggled up together, in the Desert Night Chill!

Next Morning I was challenged by the Girls "Peta" and "Ellen" as to why I always kissed Their Mother when we laid down to sleep, or when we were just sitting there doing nothing at all, "Mother Cindy" was sitting close by and looked down with a grin known only to ourselves, and I Was under close scrutiny of these two young assassins, so I answered them, and asked if they thought their Mother was a Pretty Lady or not? After but a moment silence and deep thought,

"I was told of course She was can't you see that Sir"

"Oh yes I said, and she must be kissed so she won't get Ugly?"

"Will you kissing her stop her from crying like she used too with Daddy?"

"Oh yes, so I'm told, all Pretty Ladies both old and Young have to be kissed often each day"

"Am I Pretty Sir?"

"Oh yes, very Pretty I believe, and so I can see you have been kissed very often haven't you?"

"Oh no Sir I have not indeed, not at all, in fact never?"

"Oh, I said, May I be permitted to kiss you whenever your wish me too, Men should always wait Until they are asked by Pretty Ladies, as I do to your Pretty Mother"!

Next Morning we went to the Homestead and found it empty, so we went inside and made ourselves at Home with a nice Hot Shower, and Cindy straightened up a lovely Double bed for our use while we were here, The Solar systems were very large and the water Tanks were huge, and we cleaned up the two single Rooms for the Children for the moment, while we waited for our new orders to arrive By the Wire Fence!

7.

I went out and helped ourselves to the Wood Heap and lit the “Ever hot slow combustion Wood Stove” so Cindy could Cook as well as have More Hot Water for the Laundry, whenever needed by her, I left Her here in Safety while I went out and checked what cattle was left, and their Water tanks and Windmills, and found all working as they should, and I moved those I found closer to the Homestead as well, just to show any watching eyes the place was still being worked by my Brother and I, if we were of any Interest to anyone else!

While parked on a higher rise I listened to the steady “Low thrump” of Chopper Blades, and watched it moving back and forth as It looked for me, then I watched closely as It started to lower itself, and land two hundred Yards from me, but I knew I was out of their sight, and screwed my silencer on my Mauser and closed the range to them and sat listening to them as they spoke of us as Husband and Wife and two children!

I knew we were not much longer for this life, if we were not careful who we spoke too, I was twenty feet from them when I went still and listened again, and found our Motorcycle friends now had a

visitor who owned a Chopper and was a private Pilot now in their Arsenal, so I dropped the so called officer in charge, and watched the reaction of the other two and dropped the one who ran for the Pilots side to get away, and then yelled “Freeze’ and the Sole survivor did just that, and asked him a few questions and he told me nothing we never knew already and I told him to dig Four Graves, to bury his mates in!

He dug the holes in a tight group and I helped filled them in afterwards, leaving the Fourth still open, but still full of suggestion for him to think about, we then rode back to the Homestead on my stolen Motorbike, while he jogged beside me, while I fully expected to have to bury Cindy, and the girls who ran out to greet me crying, but with a big kiss, I must say, it's been a long while since any Woman was so glad to see me alive and well, and I filled her in on the shots and deaths and any other proceedings of this Morning!

I checked the Phone and found it was Automatic “STD” operated and used my call sign number straight through to my boss and found they were about to right me and my Wife off the Payroll, so I told my Boss that Catherine was probably Dead and why, and he gave me his commiserations as he was our” Grooms Man” at our wedding, and I gave him my report!

He told me to name who I wanted out there at this Bulga Downs place as a Backup, and felt a lot better to find I had “Vince Allard” ,who would be flown In with His wife in two days’ time, and I would find Four others, one with a lady back at our hill awaiting our return, and orders but wait at Bulga Downs for Vince before you backtrack to your Hilltop, and keep your same Signals coming from the Fence and private only bar your wife, for an Introduction, I then told him about the Chopper we now own and Told him to send a pilot to pick it up rather than loose it, and he agreed to do so asap!

Will do out, and I signed off the call, and the line was silent and free of clicks and any static, and I told Cindy what and who we could expect from our boss, I explained about the Chopper we had visit us, and who owned It as well, then I kissed Her in appreciation of her courage in this weird world of mine!

8.

Next Morning we were both awoken by a massive Chopper whacking and banging her blades in an unsuccessful attempt at a silent landing twenty yards from the Homestead, Thin hot air dose that sort of thing and they do get bloody noisy indeed as well as irritate my Ears,

So we walked out Arm in Arm drinking our Morning Coffee and bowed too them all as they stepped down to us, the Four single Chaps looked Trained, and Vince and Alice were the same as when I last met them at her Wedding in Brisbane,!

Then another Lady stepped out and was Introduced as “Trainer Beth” for both our wives, in staying alive in the near future, and we all sat out on the Verandah and talked to each other to get to know each other a little, in a hurry!,

Vince asked what was going on and why, so I told him to the best of my ability, and when I got to the bit about Catherine and Cindy, he laughed and said trust you to change Sheila’s in the middle of the Game, so I hit him, and Cindy thanked me for that, and Alice looked me up and down, and nodded, Vince apologised, and I pointed out where they will find a Chopper Parked and left them

too it and Cindy and I went for a walk in discussed, We climbed in our truck and I took one of the New chaps Named Brian, with us and His bought his Shotgun and Pistol with him and we drove off with the Afternoon Sun towards our cave and cleaned it up without any Trouble at all, and Cindy started to cook an early supper for us Three and our girls as well!

The extra group immediately moved out to our North for about one hundred Miles, this formed our Advancing line of attack about one hundred mile Sickle shaped line, all of us were connected to our boss by the Wire system as well as a two way radio system, which bought us all very close together And always within contact at most times!

While I checked the Cave out for Traps or any Interference at all, after Supper I went down to the Message Fence while Cindy showed the New Chap about in the Shadows of the Cave, and returned with a Smile, I had told the Boss to pickup the little Chopper yet again where we had been!

I awoke and rolled over to Kiss Cindy Good Morning as well as some other ways to start a day, and she Was looking at me with a large happy grin almost laughing aimed at me, and I hesitated then Turned about as she closed her Legs to my advances and there stood my “Whippet,” my Name for “Ellen” my “contraception Girl”, and I was given Her permission to Kiss her good Morning, then my Mummy too please my Sir, so I did exactly as I was told, then grabbed her quickly and kissed her again, and she stuck her nose in the air and wiped the second kiss off her face and strode off!

That Morning the new Chap Brian went out on the bottom sand and set up a Hide, while I watched him with my Binoculars as he dragged a Car Bonnet with him and twenty Minutes later he was gone from my sight, other then his Show Peg to tell me his position, and I set my sights by that, and we waited as well, and I asked Cindy,  
“Did you get a bit? My girl?”

“No my man, He asked, and I thanked Him and refused him, He said, when and If I wished later!

9.

That Evening I got Permission to kiss the “Whippet” Good night, then leaned over her and kissed Peta as well, and she never said no thanks and I grinned at her to, sleep at her own dreams of Whatever Young girls Dream of, and went back to her Mother to hopefully make Her Prettier as well!

What was your standing with your passed Husband, Happily Married near separated, heading out on him, having any on the side or what?, I don't see you crying as “Ellen” has said did happen in your passed, I just want to understand, A Month ago I was on my own, now I'm almost Married and in The “Weetie Box” I've found two lovely Kids, who don't seem to miss their Daddy at all, even though they know he is Dead and how he died!

His Name was “Laurance” as in “Laurance of Arabia” but was a Pommy Emigrant, The Children are his of course, Everything was good for the first Twelve Years, then the Grass was greener over The road, at a Neighbour's House and more and more time was spent over there with her, until he told me he was taking her away to Kalgoorlie for a week or so, in this Truck and I told him not to count on us three being there when they returned!

He then offered to take me and the Kids to Kalgoorlie and leave us there for a week or two at his Sisters, so the Bitch could keep us under her thumb, so on the way there this Bomb thingy came to pass, and you know the rest, If he had taken Her for that week we would be dead right know, and Ellen knows this as well as I do, she is quite bright!

Walter, I'm not trying to hang on to you by Sympathy or entrapment, I do like your company, and I do feel more beautiful beside you as well might your Whippet, have you heard any complaints about your Kisses from either of us Sir”

“No I haven't, but I do know both of your demands are becoming more and more from you both, If You at any time meet a person that you both like a lot to take a chance at with your futures, just let me know in good time, so I can find another truck to steal for my use, and for that I received a Substantial Whack from herself, so that's the measure of my value, the bloody Truck, and I got a second whack to think about for this comment of mine!

With everything in this Camp operating as it should, I informed Cindy we might start looking at a trip to the Ocean and we will find a house and small car for your Family as well, they should be cheap enough with so many people running inland and the Sellers looking for clients in every corner Or going broke because of the times we are in!

I called up my boss the following Morning and informed him I was ready to head towards the Coast And work my way up the coast for a while and he gave me two addresses next door to each other, and informed me they were both Army houses and my Lady friend and Her children will have whichever they choose for their use as long as they wish it!

We moved out of the Camp and left it in the good hands of Vince, Alice and Brian who was heading South about to Geraldton for Radiation Readings, then North as per his orders, We travelled as Tourists due West for a week, camping by the Roadside and seeing very little of Traffic or People at all, Every Dam the Girls spotted meant a Naked Swim with Mother and I doing the same, and they just loved it at anytime it happened, and I was much the same as well!

10.

Finally we were sitting on the top of a large hill and there was the ocean, our target, below and before us all, with about seven Miles to go to reach it Properly, I was hit with a million questions, a lot I could answer while many I just guessed at which were Mostly excepted by the Audience in the Back Seat, and we slowly drove downhill to the Ocean and We turned Right to the North and drove up to the next town, Carnarvon and I parked at the two addresses I was given for this Family to live in!

The End Of Pt 2!
